

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: MindForge

Project / Product Name: ProjectMind-Personalized AI-copilot for long-term project productivity

Organization / Institution (if any): M S Ramaih Institute of Technology,Bangalore

Submission Date: 08-05-2026

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

Yes

3. Purpose of AI Usage (Brief Details)

i. Idea generation / brainstorming:

Used AI for brainstorming project ideas, workflow planning, feature improvements, and intelligent productivity concepts.

ii. Code generation or assistance:

Used AI assistance for backend APIs, frontend components, real-time Socket.IO integration, AI workflows, and VS Code extension implementation.

iii. UI / UX design:

Used AI for improving dashboard themes, analytics visualization, intelligent task workspace design, and overall user experience.

iv. Content creation:

Used AI for documentation, README generation, presentation content, architecture summaries, and project reports.

v. Data analysis:

Used AI for productivity analytics, task inference, activity intelligence, and risk analysis logic.

vi. Testing / debugging:

Used AI assistance for debugging APIs, authentication issues, realtime synchronization, activity tracking, and backend/frontend integration.

vii. Other:

Used AI for explainable AI reasoning, collaborative execution workflows, and intelligent platform recommendation systems.

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. Feature Name : AI Copilot & Productivity Intelligence

2. Self-Generated/AI-Generated/Both : Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) : Used ChatGPT, Claude Sonnet 4.5, Kiro Copilot, and Groq API for AI reasoning, productivity analytics, intelligent recommendations, and backend/frontend implementation support. Outputs were modified and integrated manually.

1. Feature Name: VS Code Activity Tracking & Collaborative Workspace

2. Self-Generated/AI-Generated/Both: Both

3. Description (include AI tools/platform Used, prompt used , Output Summary, Modification) : Used AI assistance for VS Code extension workflows, activity tracking, Socket.IO integration, debugging, intelligent task execution, and collaborative productivity features. Final implementation was customized and validated manually.

5. Ethical & Compliance Confirmation

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative:Dikshith S

Role:Full Stack Developer
